

Total Activity (TA)?

Total Activity is the measurement of the honey's anti-microbial quality, it's medicinal strength in killing both bacteria and microbes. Total Activity (TA) = Peroxide Activity (PA) + Non-Peroxide Activity (NPA)

Honey with a TA rating higher than 10+ has beneficial antimicrobial properties. The larger the TA number, the stronger the Antimicrobial effect level of the honey. Honey with a TA rating of above 25 is considered Medical Grade. The chart below compares TA ratings with equivalent UMF/MGO ratings for Manuka Honey BioActive Eucalyptus Honey has a higher Total Activity than Manuka Honey as Eucalyptus honey contains both natural Peroxide Activity (PA) for Antimicrobial properties and Non-Peroxide Activity (NPA) for Antibacterial properties. Manuka is only Antibacterial.

TA (Total Activity)	UMF (Unique Manuka)	MGO (Methylglyoxal)
35+	*	*
30+	*	*
20+	20+	829
15+	15+	550
10+	10+	263
5+	5+	100

This chart comparison shows Jungle Honey Eucalyptus BioActive honey with TA30+ is superior to manuka in Antimicrobial and Antibacterial properties.

PURE - RAW - NATURAL

Achieving BioActive Honey

'BioActive'? And what is Bioactivity? Bioactive honey contains additional beneficial compounds beyond the typical sugars and enzymes found in most honey. These extra compounds, known as bioactive components, provide a significant number of additional health benefits when compared to regular honey.

BioActive Honey with a Total Activity TA30+ is considered to be Very High - Medical Grade honey. BioActive honey with a TA 35+ is considered to be Super Strength - Medical Grade honey. Jungle Honey Company Eucalyptus BioActive Medicinal Honey contains only medicinal grade honey being harvested honey with a TA greater than 30+.

Total activity (TA) is a measure of the antimicrobial potency (bacterial + fungal). It is determined by the level of hydrogen peroxide and non-peroxide antimicrobial activity present in the honey.

Jungle Honey Company BioActive Eucalyptus Honey

Jungle Honey Company Australia produces the highest quality 100% pure raw medical grade BioActive Eucalyptus honey from our beehives right here in Australia. With Total Activity ratings of TA30+ and TA35+ our honey products offer superior health benefits to more traditional honeys like Manuka and Melaleuca.

Jungle Honey Company offer our 100% pure raw Eucalyptus BioActive Medicinal Honey in three all natural varieties:

- Jarrah Honey
- RedGum Honey
- Blackbutt Honey

Active Uses of Medicinal Honey

- Skincare
- Wounds / Facials / Acne
- Aide Respiratory Ailments
- Slow or Support Aging
- Improve Blood Health
- Aide Digestive Health
- Oral Health
- Improve Sleep
- Energy Booster
